100% PURE & SAFE – Our CBD Vape Cartridge is 100% natural and THC-free. Our ingredients are simple and effective: we start with a base of CBD distillate combined with fractionated coconut oil, then add our signature blend of natural terpenes for flavor. Its fruity taste feels smooth and full of flavor with each draw.

USAGE & DOSAGE – Draw on unit for 5 seconds, hold breath for 5 seconds, then exhale. Each draw provides approximately 3 mg of CBD. We recommend taking 2 – 4 draws per serving, and 2 – 3 servings per day for optimal benefits.

The Gold Canna Difference

What makes our vape cartridge stand out from others on the market? The Gold Canna difference is in our broad spectrum CBD distillate, which has had the THC actively removed. There are two benefits to this process:

- CBD products made from distillate have a higher concentration of cannabinoids than products made with isolate. Our Gold Canna broad spectrum distillate offers this wide range of cannabinoids with none of the THC present in other distillates on the market. As a result, our cartridge offers more powerful medicinal benefits with none of the worry.
- As our vapes are THC-free, it allows users who may be drug tested or cannot use products with trace amounts of THC to use a CBD product that contains multiple cannabinoids. . Cannabinoids are what provide the numerous health benefits that CBD oil is known for. Our 0% THC vapes are fully compliant with U.S. federal law, making them legal, safe, and untraceable if being drug tested.

DIRECTIONS — Screw vape cartridge onto any 510-threaded battery and use according to manufacturer’s directions. If using our Gold Canna adjustable voltage battery, turn the battery on by clicking button 5 times in a row. A light will appear once battery has been successfully turned on. Recommended operating voltage with our Gold Canna Battery is 3.7 volts.
