THCa Micro Diamonds – Ultra-Pure Bulk THCa Concentrate for Wholesale Buyers

Experience exceptional purity and performance with our **THCa Micro Diamonds**, precision-refined for extractors, manufacturers, and retailers seeking the highest quality in THCa concentrates. These crystalline structures deliver 99%+ THCa purity, offering consistent potency, scalability, and versatility across multiple formulations.

Designed for high-end concentrate lines and bulk manufacturing, **THCa Micro Diamonds** combine visual appeal with chemical precision — a hallmark of top-tier cannabinoid refinement.

Product Overview

THCa Micro Diamonds are fine crystalline forms of tetrahydrocannabinolic acid (THCa) produced through advanced separation and crystallization processes. Unlike larger diamonds, micro-diamonds are smaller and more manageable, offering superior integration with terpene sauces and concentrates.

Key Specifications:

- **Purity:** ≥ 99% THCa (lab-tested)
- **Texture:** Fine crystalline (micro-granular)
- **Color:** Clear to pale gold
- **Smell:** Mild aroma, customizable via terpene infusion
- **Origin:** Hemp-derived and federally compliant

Their small size and stable structure make them ideal for **vape formulations**, **infused extracts**, and **sauce applications** where precision and consistency are critical.

Lab-Tested & Certified Purity

Each batch of our **THCa Micro Diamonds** undergoes **third-party laboratory analysis** for potency, purity, and compliance.

Certificates of Analysis (COAs) confirm:

- THCa content ≥ 99%
- Delta-9 THC < 0.3% (federally legal hemp-derived)
- Non-detectable residual solvents
- No heavy metals or pesticides
- Microbial and mycotoxin safety

All results are verified for transparency, ensuring your brand and customers can trust every gram.

Wholesale THCa Bulk Pricing

We provide flexible **THCa bulk pricing** for both small-batch boutique brands and high-volume manufacturers.

Example Tiered Pricing:

Quantity	Price Tier	Ideal For
500g – 1kg	Wholesale	Retail dispensaries & extractors
1–5kg	Bulk Pricing	Manufacturers & co-packers
5kg+	Enterprise Tier	White-label & distributors

Bulk contracts and recurring supply agreements available with guaranteed consistency and volume discounts.

Why Choose Our THCa Micro Diamonds

- 99%+ lab-verified THCa purity
- Federally compliant hemp-derived concentrate
- Stable crystalline consistency for easy formulation
- Perfect for vape, dab, and infused products
- Reliable, fast fulfillment and international shipping options
- Transparent COAs and compliance documentation

As a trusted **THCa supplier**, we prioritize long-term relationships with manufacturers, offering consistent supply, exceptional product quality, and responsive service.

Applications for Bulk THCa Micro Diamonds

- **HTE (High Terpene Extract) Blends:** Combine with terpene sauce for Diamonds-in-Sauce products
- **Vape Formulations:** Dissolve into terpenes for potent, smooth cartridges
- **Dabbing Concentrates:** Perfect crystalline texture for premium dabs
- **Infused Products:** Incorporate into edibles, tinctures, and topicals
- **Private Label Manufacturing:** Supply for white-label THCa product lines

Product Lab Analysis Summary

Test Category	Result
THCa Purity	≥ 99%
Delta-9 THC	< 0.3%
Heavy Metals	Pass
Residual Solvents	Non-detectable
Pesticides	Pass
Microbial Testing	Pass
COA Provided	Yes – per batch

Storage & Handling

Store **THCa Micro Diamonds** in a sealed, light-resistant container at **15–20°C (59–68°F)**. Avoid direct sunlight, heat, and humidity to maintain crystalline stability and purity.

For extended shelf life, refrigeration or cold storage is recommended. Handle with sanitized instruments to preserve integrity.

FAQ

What are THCa Micro Diamonds?
THCa Micro Diamonds are small crystalline forms of THCa, a non-psychoactive cannabinoid precursor to THC. They're known for their purity, potency, and versatility in concentrate and vape formulations.

How are THCa Micro Diamonds made?
They are created through controlled crystallization of refined THCa extract under precise temperature and solvent conditions, producing uniform micro-sized crystals.

Are THCa Micro Diamonds psychoactive?
Not in their raw form. THCa must be decarboxylated (heated) to convert into THC, the psychoactive compound.

Are THCa Micro Diamonds lab-tested?
Yes. Every batch comes with a **third-party Certificate of Analysis (COA)** confirming potency, purity, and regulatory compliance.

Can I purchase THCa Micro Diamonds in bulk?
Yes — we offer wholesale THCa Micro Diamonds in bulk, from 500g to multi-kilogram quantities, with tiered pricing and contract supply options.

How should THCa Micro Diamonds be stored?
Keep sealed in a cool, dry environment away from light and heat to maintain structure and potency. Refrigeration is recommended for long-term storage.

Our **THCa Micro Diamonds** set the standard for purity, compliance, and consistency. With 99%+ THCa content, verified COAs, and competitive bulk pricing, these fine crystals empower brands and manufacturers to produce premium concentrates that stand out in today's market. Partner with a **trusted THCa supplier** who understands your business and delivers excellence — every batch,

every time.
