What Is THCA Flower?

THCA flower is premium hemp-derived cannabis flower naturally rich in tetrahydrocannabinolic acid (THCA). In its raw form THCA is non-intoxicating; when heated through smoking or vaping it converts to THC (decarboxylation), delivering the full experience. Every batch is third-party lab tested and compliant with the 2018 Farm Bill.

How to Enjoy Glitterbomb THCA Flower

Grind a small amount and enjoy it in a pipe, bong, joint, or dry-herb vaporizer. Store the buds in an airtight glass jar away from light and heat to preserve the terpenes, aroma, and potency.
