

## Why Herijuana Is Trusted by Global Cannabis Buyers

**Herijuana** is a legendary indica strain bred from **Petrolia Headstash** and **Killer New Haven**, offering a deep, sedative high that appeals to medical and recreational users alike. Its pungent aroma—earthy, spicy, with a hint of diesel—signals the potency locked within its dense buds.

This strain is especially popular in international medical cannabis markets, thanks to its therapeutic properties for pain, insomnia, and anxiety. It's also a hit among distributors seeking reliable inventory with verified potency and compliance certifications.
