

London Pound Cake THCa Flower: Bulk Supply for Wholesale Buyers

For wholesale buyers sourcing premium THCa hemp flower, **London Pound Cake THCa Flower** delivers an irresistible dessert-flavored indica experience with strong potency, appealing aromas, and full lab verification. Grown by trusted cultivators, this strain offers deep relaxation, rich buttery vanilla and lemon notes, and is ideal for bulk orders in pre-rolls, extracts, retail flower, or white label lines. Every batch comes with a lab Certificate of Analysis (COA) to ensure potency, compliance, and safety, giving you peace of mind in your supply chain.

Lab Analysis

Here are representative lab results for London Pound Cake THCa Flower (actual values may vary by batch; always verify with latest COA)

Parameter	Typical Result
THCa Content	~ 24.8 % THCa (e.g. Dr.Ganja measurement)
Total Cannabinoids	~ 27.55 % (THCa + minor cannabinoids)
Δ 9-THC	~ 0.276 % (legal compliant)
Terpene Profile	Dominant: Myrcene, Caryophyllene, Limonene; flavor notes of butter, lemon, vanilla
Effect Profile	Indica-dominant; relaxing body effects, mild euphoria, dessert-like calm
Aroma / Flavor	Butter, vanilla, lemon, sweet cake undertones

Wholesale Advantages of London Pound Cake THCa Flower

1. High Potency & Premium Flavor

With THCa ~ 25-28 %, dessert/cake flavors, and strong aroma, this strain allows wholesale buyers to offer a premium product and justify higher margins.

2. COA-Backed Compliance

Every batch has lab-tested $\Delta 9$ -THC under legal thresholds. Full lab reports help with labeling, compliance, and avoiding regulatory risk.

3. Appealing Aroma & Consumer Pull

The dessert-cake flavor (butter, vanilla, lemon) is highly desirable in retail markets; customers often seek these “treat” or “dessert” style strains.

4. Versatility in Product Use

London Pound Cake works well not just as bulk flower, but also for extracts,

vapes (terpene extraction), pre-rolls, and white-label packaging.

5. **Bulk Economies**

Ordering in larger volumes drives per-unit cost down, improving your profit margins.

6. **Differentiation in Market**

Dessert/cake flavor strains are premium in perception. Carrying this strain helps your catalogue stand out in a crowded THCa/hemp marketplace.

FAQs

What does “indica-dominant” mean for London Pound Cake?

It means that this cultivar tends to produce more relaxing, body-focused effects compared to sativa-dominant strains. Expect a gentle calm, help with evening wind-down, stress relief, and mild sedation without extreme couch lock in moderate doses.

Is London Pound Cake THCa Flower legal?

Yes, as long as the $\Delta 9$ -THC content in the dried flower is $< 0.3\%$ (or per your local jurisdiction's threshold). Verified lab tests show this strain typically complies. Always double-check state and local regulations before shipping or selling.

How should London Pound Cake be stored to preserve flavor & potency?

Store in airtight, light-blocking containers (opaque jars or vacuum sealed packaging), in a cool, dark environment between ~ 60 - 70°F , and moderate humidity (~ 55 - 62%). Avoid heat and light which degrade terpenes and convert THCa into $\Delta 9$ -THC.

What is the minimum wholesale order quantity (MOQ)?

Wholesale MOQs generally start at **10 lbs**, with better pricing at larger tiers (50 lbs, 100 lbs). Packaging and trim options often vary with volume.

Will I receive a full Certificate of Analysis (COA) with each batch?

Yes, reputable suppliers of London Pound Cake THCa flower provide COA verifying potency, terpene profile, heavy metals, pesticides, moisture, and microbiological safety.

What kind of effects and flavors will my customers experience?

Expect a rich dessert experience: buttery, vanilla-cake with lemon or citrus undertones. Effects are deeply relaxing, soothing body high, mild mood uplift, often used in evening or for symptom relief for stress, insomnia, or pain.
