

As a leading THCa supplier, we are proud to offer our flagship product: **THCa Isolate - Bulk THCa Concentrate**. Designed specifically for wholesale buyers such as dispensaries, extract brands, CBD/THC manufacturers and retailers, this product delivers the quality, compliance and scalability your business demands.

Premium Purity & Consistency

Our THCa isolate is refined to a minimum of **99%+ THCa** purity. Each batch undergoes rigorous third-party testing to verify cannabinoid potency, residual solvents, heavy metals and pesticide compliance. This high level of purity ensures you receive a crystalline, colour-white powder that is free from extraneous cannabinoids, terpenes or plant material — ideal for formulation precision and minimal flavour/odour interference.

Lab-Tested & Fully Documented

We believe transparency builds trust. For every lot of our bulk THCa concentrate, we provide a Certificate of Analysis (COA) from an accredited third-party laboratory. The COA confirms:

- THCa content (99%+ typical)
- Delta-9 THC levels (below applicable regulatory thresholds)
- Absence or acceptable levels of heavy metals, residual solvents and microbial contaminants

This lab-tested assurance supports your compliance and product integrity when packaging, labelling or marketing downstream formulations.

Competitive Bulk Pricing & Wholesale Availability

We understand the margin pressures of the cannabinoid industry. That's why our pricing is structured for **bulk THCa buyers** — from kilo-scale to multi-kilogram orders. Whether you're integrating THCa into edibles, topicals, vape formulations or white-label concentrates, our bulk pricing model supports scalable growth. For

example, marketplace data shows pricing at ~€3,150/kg for 10 kg orders (EU market) for 99.8% THCa isolate.

Shipping, Compliance & Supply Chain Reliability

We maintain robust logistics with cold-chain or tracked shipping where necessary, ensuring your THCa arrives in optimal condition. Our supply chain is built around compliance with hemp-derived cannabinoid regulations and reliable inventory for recurring bulk orders.

Brand Authority & Partnership Benefits

By choosing us as your THCa supplier, you gain more than raw material — you partner with a team experienced in cannabinoid inputs, formulation support and B2B service. Our clients include established extractors and wellness brands who prioritise consistency, documentation and business-to-business trust. With our input, you can accelerate your product launches and maintain a competitive edge in a growing THCa market.

Suggested Applications for Bulk THCa Concentrate

- Infused edibles and beverages: utilize neutral taste, high potency THCa isolate for precision dosing
- Topicals and skincare formulations: incorporate THCa isolate into creams, salves or balms
- Vape cartridges and concentrates: build formulations or blends with ultra-pure THCa
- Private label and white-label production: bulk THCa isolate enables custom brand products
- Research and development: use as a standardized input for innovation in cannabinoid products

Storage & Handling Recommendations

To preserve maximum potency and purity, store the THCa isolate in a **cool, dry, dark environment**, sealed and away from direct heat, light or humidity. Proper storage ensures long-term stability and consistency.

Product Lab Analysis Summary

- THCa content: Typically \geq **99%**
 - Delta-9 THC: Below regulatory limit (e.g., $<0.3\%$ where applicable)
 - Heavy metals: Within acceptable regulatory thresholds
 - Residual solvents: Non-detectable or within specification
 - Microbial testing: Pass in third-party COA
 - Batch specific COA provided with each order

FAQ

Q: What is THCa isolate and how does it differ from THC?

A: THCa (tetrahydrocannabinolic acid) is the non-psychoactive precursor molecule found in raw hemp/cannabis. It converts into THC (tetrahydrocannabinol) only when exposed to heat through decarboxylation. THCa isolate is a purified crystalline form containing typically 99%+ THCa, with minimal other cannabinoids.

Q: Why should I choose wholesale THCa isolate for my business?

A: For manufacturers, retailers, extractors and brands, wholesale THCa isolate

provides a highly potent, neutral-flavour and consistent input material. It allows precise dosing, formulation flexibility (edibles, topicals, concentrates) and margin advantage via bulk pricing.

Q: How do I know the THCa is lab-tested and compliant?

A: Each batch of our bulk THCa concentrate comes with a third-party Certificate of Analysis (COA) verifying potency, purity, heavy metals, residual solvents and total THC level. You can review the COA before purchase to ensure compliance.

Q: What bulk volumes and pricing are available for THCa concentrate?

A: We support kilo-scale orders and multi-kilogram orders. Bulk pricing is competitive and tailored to your order volume. For example, EU wholesale listings show pricing from ~€3,150/kg for large volume orders of 99.8% THCa isolate.

Q: Is THCa legal to purchase and use as a raw material?

A: Legal status varies by jurisdiction. In many markets, hemp-derived THCa that maintains delta-9 THC below regulatory thresholds (e.g., <0.3% in the U.S.) is compliant. However, you must verify your local and state regulatory framework and ensure your product formulation and labeling comply accordingly.

Q: How should I store and handle THCa isolate for best results?

A: Store in a cool (preferably < 20°C), dry, dark environment, sealed against moisture and oxygen. Avoid prolonged exposure to heat or light. Proper storage preserves potency and prevents degradation of the crystalline material.

Q: Can THCa be used in multiple formulation types?

A: Yes — bulk THCa concentrate is highly versatile. You can integrate it into edibles, tinctures, topicals, vape cartridges or other cannabinoid products, thanks to its neutral flavour profile, high potency and isolation from other interfering compounds.

This premium THCa isolate offering is built for growth-focused businesses ready to scale their cannabinoid product lines with a reliable, compliant, and high-quality input. Partner with us as your trusted THCa supplier and access bulk THCa concentrate that supports your brand's production, profitability and market leadership.
