

## **THCa Micro Diamonds - Ultra-Pure Bulk THCa Concentrate for Wholesale Buyers**

Experience exceptional purity and performance with our **THCa Micro Diamonds**, precision-refined for extractors, manufacturers, and retailers seeking the highest quality in THCa concentrates. These crystalline structures deliver 99%+ THCa purity, offering consistent potency, scalability, and versatility across multiple formulations.

Designed for high-end concentrate lines and bulk manufacturing, **THCa Micro Diamonds** combine visual appeal with chemical precision — a hallmark of top-tier cannabinoid refinement.

---

### **Product Overview**

**THCa Micro Diamonds** are fine crystalline forms of tetrahydrocannabinolic acid (THCa) produced through advanced separation and crystallization processes. Unlike larger diamonds, micro-diamonds are smaller and more manageable, offering superior integration with terpene sauces and concentrates.

#### **Key Specifications:**

- **Purity:**  $\geq$  99% THCa (lab-tested)
- **Texture:** Fine crystalline (micro-granular)
- **Color:** Clear to pale gold
- **Smell:** Mild aroma, customizable via terpene infusion
- **Origin:** Hemp-derived and federally compliant

Their small size and stable structure make them ideal for **vape formulations**, **infused extracts**, and **sauce applications** where precision and consistency are critical.

## Lab-Tested & Certified Purity

Each batch of our **THCa Micro Diamonds** undergoes **third-party laboratory analysis** for potency, purity, and compliance.

### Certificates of Analysis (COAs) confirm:

- THCa content  $\geq$  99%
- Delta-9 THC < 0.3% (federally legal hemp-derived)
- Non-detectable residual solvents
- No heavy metals or pesticides
- Microbial and mycotoxin safety

All results are verified for transparency, ensuring your brand and customers can trust every gram.

---

## Wholesale THCa Bulk Pricing

We provide flexible **THCa bulk pricing** for both small-batch boutique brands and high-volume manufacturers.

### Example Tiered Pricing:

Quantity	Price Tier	Ideal For
500g - 1kg	Wholesale	Retail dispensaries & extractors
1-5kg	Bulk Pricing	Manufacturers & co-packers
5kg+	Enterprise Tier	White-label & distributors

Bulk contracts and recurring supply agreements available with guaranteed consistency and volume discounts.

---

### Why Choose Our THCa Micro Diamonds

- 99%+ lab-verified THCa purity
- Federally compliant hemp-derived concentrate
- Stable crystalline consistency for easy formulation
- Perfect for vape, dab, and infused products
- Reliable, fast fulfillment and international shipping options
- Transparent COAs and compliance documentation

As a trusted **THCa supplier**, we prioritize long-term relationships with manufacturers, offering consistent supply, exceptional product quality, and responsive service.

---

## Applications for Bulk THCa Micro Diamonds

- **HTE (High Terpene Extract) Blends:** Combine with terpene sauce for Diamonds-in-Sauce products
  - **Vape Formulations:** Dissolve into terpenes for potent, smooth cartridges
  - **Dabbing Concentrates:** Perfect crystalline texture for premium dabs
  - **Infused Products:** Incorporate into edibles, tinctures, and topicals
  - **Private Label Manufacturing:** Supply for white-label THCa product lines
- 

## Product Lab Analysis Summary

Test Category	Result
THCa Purity	≥ 99%
Delta-9 THC	< 0.3%
Heavy Metals	Pass
Residual Solvents	Non-detectable
Pesticides	Pass
Microbial Testing	Pass
COA Provided	Yes - per batch

---

## Storage & Handling

Store **THCa Micro Diamonds** in a sealed, light-resistant container at **15-20°C (59-68°F)**. Avoid direct sunlight, heat, and humidity to maintain crystalline stability and purity.

For extended shelf life, refrigeration or cold storage is recommended. Handle with sanitized instruments to preserve integrity.

---

## FAQ

### **What are THCa Micro Diamonds?**

THCa Micro Diamonds are small crystalline forms of THCa, a non-psychoactive cannabinoid precursor to THC. They're known for their purity, potency, and versatility in concentrate and vape formulations.

### **How are THCa Micro Diamonds made?**

They are created through controlled crystallization of refined THCa extract under precise temperature and solvent conditions, producing uniform micro-sized crystals.

### **Are THCa Micro Diamonds psychoactive?**

Not in their raw form. THCa must be decarboxylated (heated) to convert into THC, the psychoactive compound.

### **Are THCa Micro Diamonds lab-tested?**

Yes. Every batch comes with a **third-party Certificate of Analysis (COA)** confirming potency, purity, and regulatory compliance.

### **Can I purchase THCa Micro Diamonds in bulk?**

Yes — we offer wholesale THCa Micro Diamonds in bulk, from 500g to multi-kilogram quantities, with tiered pricing and contract supply options.

### **How should THCa Micro Diamonds be stored?**

Keep sealed in a cool, dry environment away from light and heat to maintain structure and potency. Refrigeration is recommended for long-term storage.

---

Our **THCa Micro Diamonds** set the standard for purity, compliance, and consistency. With 99%+ THCa content, verified COAs, and competitive bulk pricing, these fine crystals empower brands and manufacturers to produce premium concentrates that stand out in today's market. Partner with a **trusted THCa supplier** who understands your business and delivers excellence — every batch,

every time.
