Crumble vs Badder

THCA Crumble and Badder are both cannabis concentrates with distinct characteristics. Crumble is dry, flaky, and easy to break apart, making it ideal for sprinkling on flower or precise dosing. Badder, on the other hand, has a creamy, butter-like consistency with higher moisture content, making it easier to handle with a dab tool.

Please note that slight color variations between jars are normal and fall within our quality standards. These minor differences can occur from batch to batch and are considered acceptable, as shown on our website.
